Wed 8.30am till 5pm
Lunch 12.30pm till 1pm

The Anchor Dental Centre first opened in August 2004, based at Hinchingsbrooke Hospital in a Portakabin adjacent to the main building while we waited for the Oak Tree Health Centre to be constructed.

We moved to our new premises in August 2006 and at last count we have assisted approximately 7500+ patients in Huntingdon and the surrounding area.

We can now offer a wider range of treatments from line and wrinkle reduction, dental implants and teeth whitening using the ZOOM!® System, either in surgery or with take home kits all under safe dental supervision.

Dental Team

Dr Robert Ayre is the principal and owner of the Anchor Dental Centre and the Priory Dental Centre. He qualified from Liverpool University in 1979 and has been in general practice since then, mainly providing treatment under the NHS. He now also owns practices in Royston and Peterborough.

Resident Dentists

Dr Bainbridge, qualified in Sheffield 2000 and worked in a Hospital environment before joining us in October 2005.

Dr Busfield qualified at Bristol University in 1971. He had his own practice in Southampton until 1985 then spent 17 years working in Germany where he gained experience in prosthetics before moving to Sweden for 3 years. Mr Busfield has recently returned to the UK and joined us in August 2005.

Clinical Nurses

Our Dental Nurses are Patricia Ashcroft, Kellie Smith, Sarah Holgate, Vikki Cooper and Vilma Beckett. Mrs Ashcroft, Miss Smith and Miss Holgate joined us in 2005. Miss Cooper and Mrs Beckett joined us in 2006. All are experienced in Dental Nursing.

Practice Manager

The practice manager is Jackie Smith and she is responsible for all the administration, staff duties as well as day to day running of the practice. Mrs Smith joined us in 2003.

Treatments

We endeavour to provide a broad range of treatments under the NHS however Orthodontics is not performed within our surgeries and is treated on a referral basis.

Privately we can now offer a wider range of treatments, we also strive to utilise the latest and most up to date equipment and provide the best treatment for our patients. To this aim we are using Digital Imagery for our Dental Radiographs which considerably reduces the exposure to X-rays.
